

COMMUNITY NOTICE

TOWER CRANE INSTALLATION

A significant milestone in the construction of the \$150 million Goulburn Hospital and Health Service Redevelopment Project will be marked with the arrival and installation of the project's tower crane.

UPCOMING WORK

A tower crane will be established on site using a 130 tonne mobile crane. The tower crane will be delivered to the development site on semi-trailers. All works associated with the installation of the tower crane will be undertaken within the development site. The map below details the future location of the tower crane:

Tower crane establishment - Set up plan

WHAT'S INVOLVED?

- To minimise disruption to local residents and traffic, the tower crane will be transported on semi-trailers and will be delivered to the development site by 07:00 am on Tuesday 10 March 2020.
- The Faithful Street Works Zone will be used for the delivery of crane components.
- Safety is our number one priority. Traffic controllers will be in place on Faithful Street for the duration of the crane set up to ensure the safe movement of pedestrians and vehicles.
- To reduce the impact of construction traffic on local streets specific construction vehicle routes will be used to and from the development site. The construction vehicle routes are as follows:

HANSENYUNCKEN

Construction vehicle approach routes

- North: Hume Highway, Sydney Road, Union Street, Reynolds Street, Grafton Street, Sloane Street, Clifford Street, Faithfull Street.
- South: Hume Highway, Hume Street, Cowper Street, Clinton Street, Faithfull Street.

Construction vehicle departure routes

- North: Faithfull Street, Goldsmith Street, Sloane Street, Grafton Street, Reynolds Street, Union Street, Sydney Road, Hume Highway
- South: Faithfull Street, Clinton Street, Cowper Street, Hume Street, Hume Highway

DATE OF WORK

The work will commence from Tuesday 10 March 2020 and is expected to be completed Thursday 12 March 2020 (weather and construction conditions permitting).

WHAT TO EXPECT?

- Every effort will be made to minimise disruption to our neighbours, however due to the nature of the work some localised noise and vibration may occur during the use of heavy machinery and equipment.
- Loads are required to travel between certain times. Traffic controllers will be on-site for the duration of the crane set-up. Residents may wish to factor in additional travel times as there may be slight delays.

CONSTRUCTION HOURS

- On-site construction working hours are 7:00am to 6:00pm, Monday to Friday, and 8:00am to 1:00pm on Saturday. No work will take place outside of these hours or on public holidays without prior notice and approvals.
- Delivery and transport of crane components may occur outside of these times. However, construction works will not commence on-site until 7:00am.

KEEPING YOU INFORMED

We are committed to being good neighbours and encourage you to contact us if you have any enquiries or concerns. We will:

- Provide clear, relevant and timely information about construction activities.
- Provide prior notice if construction works are required outside of our general construction hours.
- Be accessible for you to ask questions, raise issues or find out more information.
