

Important information: Goulburn Base Hospital main entry opening

From 9 December 2022, the main entry and main carpark for the Goulburn Base Hospital will be open.

This means there will be changes to the way the community access the clinical service building via the new main entrance and reception, as well as the Emergency entrance.

In this update you will find information about the new entry arrangements, where to park, and changes to driveway entrances and exits.

Main entry

From 9 December 2022, all patients and visitors to Goulburn Base Hospital, except for people attending Emergency and Medical Imaging, should access the Hospital from the newly opened main entry.

The main entry is located on the ground level of the Goulburn Base Hospital, off Goldsmith Street and up the external stairs from the Emergency entrance.

Emergency entry

All emergency patients and medical imaging outpatients should continue to access the Hospital from the Emergency entrance, located on the lower ground level of the Goulburn Base Hospital's Clinical Service Building, off Goldsmith Street.

The Emergency car park off Goldsmith Street remains available for all emergency patients and medical imaging outpatients.

Dedicated disability and mobility parking spaces are available in the Emergency car park as well as patient drop-offs and pick-ups. Parking time limits are in place.

New car park

From 9 December 2022, the new main entry car park will be open for patients and visitors.

The car parking area includes:

- 26 new public car parking spaces, including 4 dedicated disabled and limited mobility car spaces
- 10 parking spaces for on call medical officers
- a semi-circular driveway for patient drop-off and pick-ups

Please be aware that parking time limits are in place for public car parking spaces on site, and time limited parking will remain in the off-site car parking spaces around the hospital.

New driveway entrances and exits

Please take extra care, be considerate, and watch out for pedestrians and other vehicles.

There are several driveway entrances and exits from the Hospital, including

- Goldsmith Street: Entry and exit to the main entry car park
- Goldsmith Street: Entry and exit to the Emergency and Medical Imaging car park
- Faithfull Street: Dedicated ambulance, police, corrections and patient transport vehicles entry and exit. Entrance and exit for the fleet car park
- Faithfull Street: Service road exit only from the internal loading dock supporting the Clinical Services Building.
- Clifford Street: Entry and exit to the temporary car park for Renal, Physiotherapy and Fleet vehicles. Service entry to internal loading dock and support services supporting the health service such as stores, waste, oxygen etc.

Following the completion of the redevelopment there will be an additional car park off Albert Street to support outpatient services.

New shared pedestrian and vehicle zones

There are a number of new shared pedestrian and vehicle zones across the hospital campus. Please take extra care, be considerate and watch out for pedestrians and other vehicles.

Work to complete the redevelopment will continue across the Goulburn Base Hospital site. This work may result in temporary changes to access and movement around the hospital.

Please pay attention to all signage and take extra care. If you need help, please contact the hospital or see the volunteer guides in the Main Entrance foyer.

What's next?

Construction is now underway on the final stage of the \$165 million Goulburn Hospital and Health Service redevelopment.

The final works stage features:

- Ambulatory outpatients – including physiotherapy and occupational therapy, hospital in the home, wound clinics, stress testing and audiometry
- Pathology – Specimen collection
- Oncology
- Aboriginal health
- Transitional living unit
- A new MRI service
- Clinical training facility – part of the ANU redevelopment
- Upgraded car parking off Albert Street (Albert Augustus Betts car park) to cater for renal, oncology, specimen collection and ambulatory outpatients
- Staff workspaces

The four-storey clinical services building was officially opened in December 2021 and includes a new emergency department, maternity services, an intensive care unit as well as operating theatres, day surgery and recovery areas.
